

IZZUDIN ALQASSAM

South Jakarta, DKI Jakarta | **Phone** : 0856-9326-8094 | **Mail** : izzudin.alqa@gmail.com
Github : github.com/Izzudinalqassam

Fresh graduated IT Professional with nearly 3 years of experience across software development, system administration, technical operations, and IT support. Skilled in Linux and Windows administration, web application development, database management, application deployment, troubleshooting, and production support. Hands-on experience with Docker, PostgreSQL, MySQL, networking, and IoT-based systems, with a strong ability to adapt across diverse technology environments.

Experience

TechOps Engineer - Contract

February 2025 – Present

PT Nodeflux Teknologi Indonesia

South Jakarta, Indonesia

- **Infrastructure & Server Management:** Manage and maintain 100+ Linux production servers across diverse client environments, ensuring 99.9% infrastructure stability, performance, and operational reliability.
- **Process Automation:** Automated provisioning and deployment workflows for 50+ Docker-based services using Ansible, minimizing manual intervention and establishing strict configuration consistency.
- **Database & Solution Administration:** Administer production PostgreSQL databases and deploy AI/computer vision solutions using Docker containers, executing backup validation, query monitoring, and user access management.
- **Observability & Monitoring:** Implemented centralized monitoring and observability frameworks for 100+ infrastructure and application components using Prometheus, Grafana, and SigNoz to enable proactive anomaly detection.
- **Incident & Risk Management:** Monitor system logs and workloads to conduct root-cause analysis (RCA) on production incidents, providing 24/7 operational support to minimize client service disruptions.

Achievement

- Successfully automated deployment workflows for 20+ multi-container Docker services using Ansible, establishing strict configuration consistency and significantly reducing manual deployment cycles across 100+ production servers.

IT Programmer - Internship

September 2024 – January 2025

PT Jababeka, Tbk

Cikarang, Indonesia

- **System Architecture & Development:** Architected a web-based workforce attendance and vehicle tracking system using PHP, MySQL, and ESP8266 microcontrollers, reducing manual data entry workloads by approximately 50%.
- **Data Integration & IoT:** Engineered a relational MySQL database with 10+ optimized tables to synchronize real-time RFID transaction logs and monitor check-ins for 100+ personnel.
- **Process Optimization:** Designed and implemented an internal Environment, Health, and Safety (EHS) management system, streamlining reporting workflows and cutting administrative overhead by 50%.
- **Technical Documentation:** Formulated over 20 pages of exhaustive technical documentation covering system architecture, database design, and operational deployment guidelines.

Achievement

- Spearheaded the development of a web-based IoT attendance and vehicle tracking system, directly reducing manual administrative data entry workloads by approximately 50% for 100+ on-site personnel.

Technical Support - Internship

May 2024- September 2024

Universitas Bina Sarana Informatika

Cikarang, Indonesia

- **Operations Support:** Prepared, verified, and maintained campus computer labs and classroom technical setups weekly, ensuring seamless readiness for dozens of academic staff.
- **Incident Management:** Responded to real-time technical disruptions during live classes and campus events, rapidly resolving hardware, networking, or audio-visual issues within minutes.

IBM Cloud & Cyber Security - Internship

August 2023- January 2024

PT Kinema Systrans Multimedia (Infinite Learning)

Online, Indonesia

- **System Administration:** Assisted in administering Red Hat Enterprise Linux (RHEL) virtual machines, configuring user access rights, directory permissions, and core service setups under supervision.
- **Security Monitoring & Compliance:** Conducted security monitoring and log analysis using IBM QRadar to detect potential network anomalies, while applying basic firewall rules to secure test environments.

Achievement

- Recognized as the **Most Active Student with the Highest Academic Performance**

IT - Support - Internship	May 2024- September 2024
PT Prima Unggul Persada	Cikarang, Indonesia
• Technical Support & Troubleshooting: Resolved hardware, software, and basic connectivity issues for office users, maintaining workstation readiness across targeted departments. • Helpdesk Operations: Assisted in processing daily technical helpdesk requests, troubleshooting common user problems, and escalating critical issues to senior engineers. • Data Maintenance & Compliance: Executed routine preventive maintenance checks and assisted with standard data backup workflows in strict accordance with IT security guidelines.	

Education

Juara GCP Season 12	Jan 2026 - March 2026
Google Cloud AI Study Jam credly.com/users/izzudin-al-qassam	Online
Participated in #JuaraGCP Season 12, a structured self-paced learning program focused on AI, Machine Learning, Data, and Security using Google Cloud Platform.	
• Participated in #JuaraGCP Season 12, a structured self-paced learning program focused on AI, Machine Learning, Data, and Security using Google Cloud Platform. • Completed hands-on labs using Gemini, Vertex AI, and Agent Development Kit (ADK) to build and deploy AI-driven solutions on Google Cloud. • Earned 10+ Google Cloud badges (including 6+ skill badges) by completing real-world scenarios and guided labs. • Gained practical experience with Google Cloud services through interactive labs on AI/ML workflows, cloud architecture, and security best practices. • Collaborated with the Google Cloud developer community in Indonesia, engaging in discussions and knowledge sharing with peers and industry practitioners. • Strengthened cloud problem-solving skills through challenge-based labs aligned with industry use cases.	
Universitas Bina Sarana Informatika - Technology Information	Sept 2021 - Des 2025
Bachelor Degrees (S1) - GPA 4.00/4.00	Cikarang, Indonesia
Thesis : Perancangan Sistem Monitoring Karyawan Secara Real Time Berbasis IOT dan Website Pada PT Jababeka&Co Site PT Bekasi Power	
• Selected for and successfully completed two Kampus Merdeka MSIB cohorts (Batch 5 & 7), involving hands-on experience in system administration, cloud computing, cybersecurity, and full-stack web development	

Certifications

• Network Administrator Madya - [BNSP - 2023/2028] • Pengembang Perangkat Lunak - [BNSP - 2024/2029] • PCAP-Programming Essentials in Python Netacad - PCAP CISCO
--

Skills

Technical Skills
• Operating Systems & System Administration : Linux (Ubuntu, Red Hat Enterprise Linux), Windows Administration, User & Permission Management, Service Configuration, System Maintenance • Containerization, Automation & Deployment: Docker, Docker Compose, Ansible • Monitoring & Observability : Prometheus, Grafana, SigNoz, Node Exporter, Log Analysis, Incident Troubleshooting. • Databases: PostgreSQL, MySQL, Database Design, SQL Query Development. • Programming & Integration: PHP, REST APIs, Python, JavaScript, Git. • Cloud & Infrastructure: AWS (Fundamental), IBM Cloud, Virtual Machine Provisioning. • Networking: TCP/IP, Network Troubleshooting, Mikrotik, Cisco Packet Tracer. • Security Fundamentals: IBM QRadar, Endpoint Protection, Backup & Recovery, Security Monitoring • IoT & Embedded Systems: ESP8266, RFID Integration.
